

UOB

Synthetic Investment Research Report

Ticker: U11 | Sector: Singapore Banks | Currency: SGD

IMPORTANT: This document contains synthetic data generated for an AI investment research prototype. It is not real investment research and must not be used for investment decisions.

1. Executive Summary

UOB is represented in this synthetic dataset as a Singapore Banks company. The latest synthetic fundamental snapshot reports a net interest margin of 2.02%, ROE of 12.23%, CET1 of 16.11% and NPL ratio of 1.30%.

The synthetic one-year share-price return is approximately 15.87%, while the maximum historical drawdown in the generated series is approximately -28.47%.

Metric	Value
Revenue	13,970
Net Interest Income	8,494
NIM	2.02%
ROE	12.23%
CET1	16.11%
NPL	1.30%
P/E	9.64x
P/B	1.15x

2. Historical Share Performance

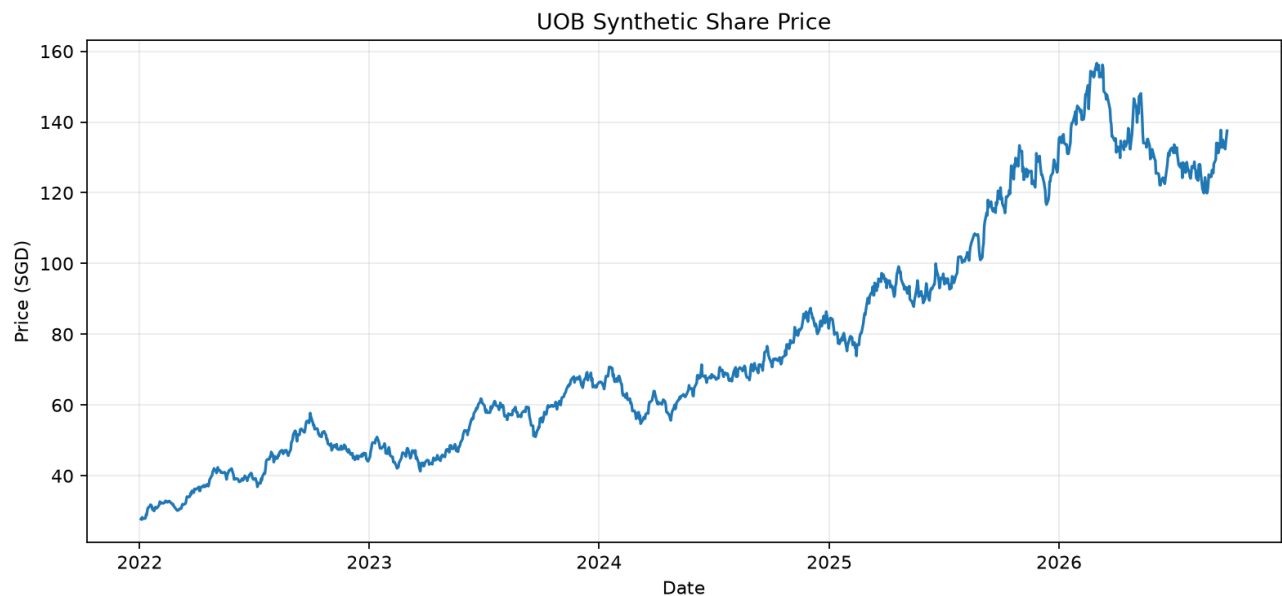

Figure 1. Synthetic daily closing-price history. Source: market.db / daily_prices.

3. Fundamental Performance

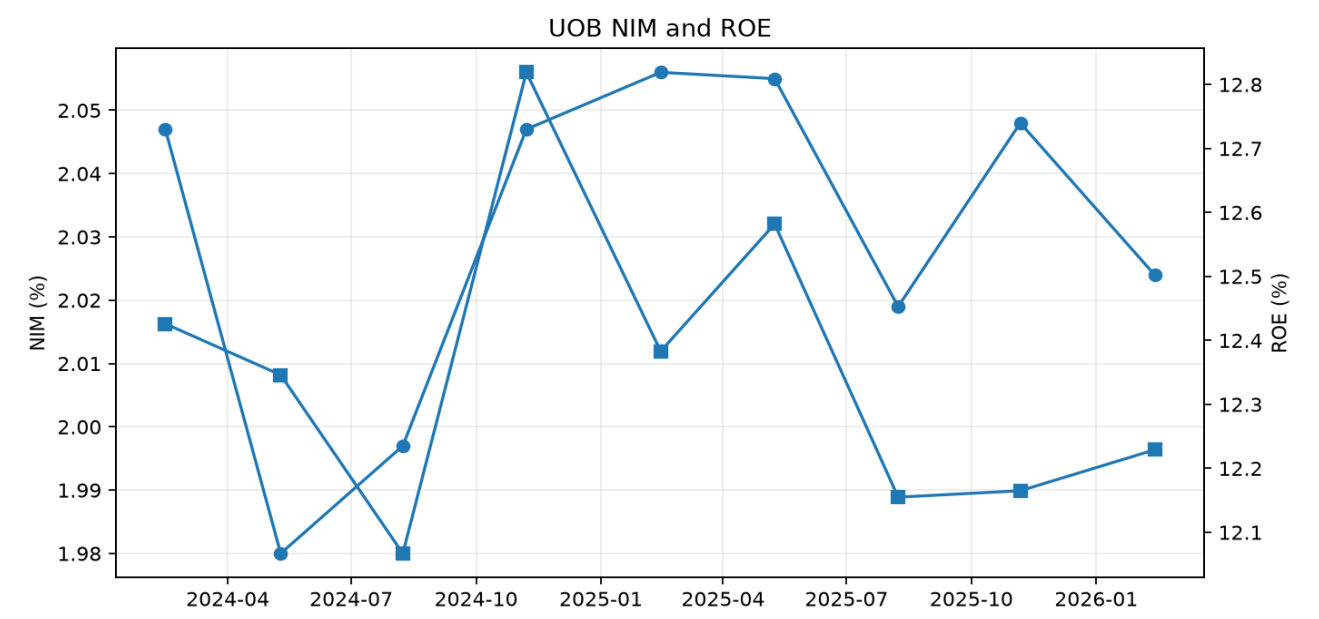

Figure 2. Synthetic NIM and ROE history. Source: market.db / fundamentals.

Date	Revenue	NIM	ROE	CET1	NPL	P/B
2024-11-07	13,081	2.05%	12.82%	16.26%	1.32%	1.36x
2025-02-14	13,303	2.06%	12.38%	16.09%	1.32%	1.29x
2025-05-09	13,255	2.06%	12.58%	16.07%	1.23%	1.14x
2025-08-08	13,675	2.02%	12.15%	15.88%	1.35%	1.23x
2025-11-06	13,667	2.05%	12.16%	16.04%	1.23%	1.24x
2026-02-13	13,970	2.02%	12.23%	16.11%	1.30%	1.15x

4. Trading Activity

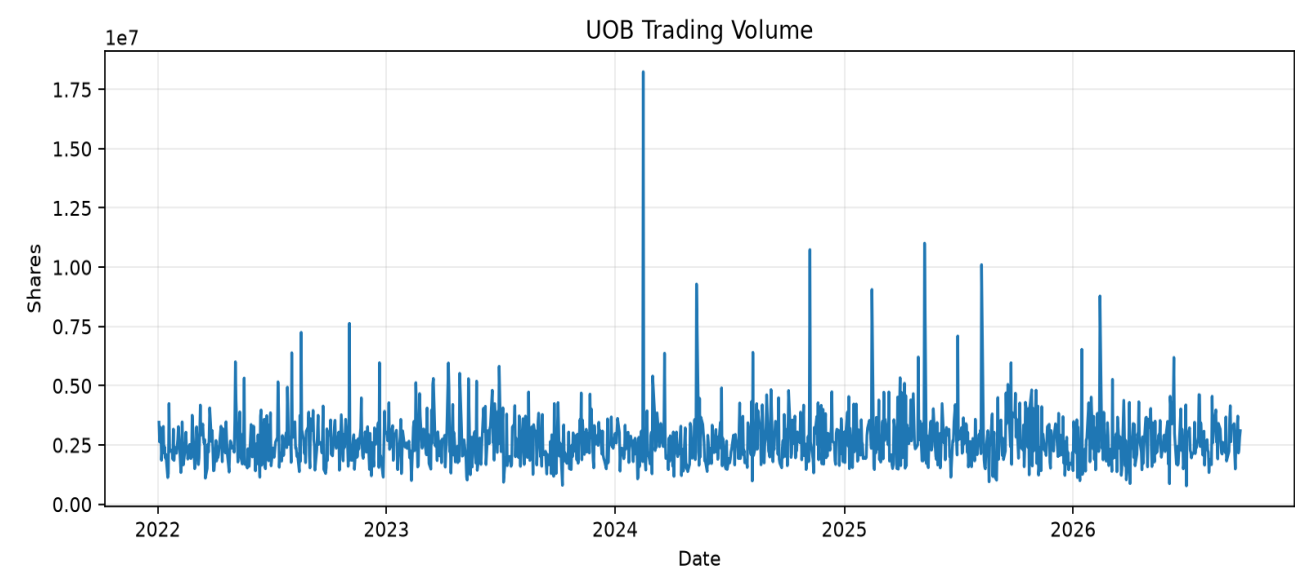

Figure 3. Synthetic daily trading volume. Event dates contain deliberately generated volume spikes to support event-driven research.

5. Historical Investment Events

Event	Date	1-Day Price Reaction
-------	------	----------------------

The event IDs above will later be reused across synthetic news articles, Outlook messages, analyst presentations and investment committee documents. This deliberately creates cross-source evidence that an agent must reconcile.

6. Valuation Framework

The latest synthetic valuation snapshot shows a P/E ratio of 9.64x and P/B ratio of 1.15x. These figures are synthetic and are intended to support relative-value reasoning by the prototype agent.

Metric	Latest
EPS	3.129
Book Value / Share	23.320
P/E	9.64x
P/B	1.15x
ROE	12.23%

7. Key Risks and Research Questions

- Sensitivity of NIM to changes in the interest-rate environment.
- Potential deterioration in asset quality and NPLs.
- Changes in loan and deposit growth.
- Valuation compression despite stable profitability.
- Sector-wide market movements obscuring company-specific performance.
- Event-driven volatility around earnings announcements.

8. Data Provenance

Evidence Type	Source
Daily prices	market.db / daily_prices
Trading volume	market.db / daily_volume
Fundamentals	market.db / fundamentals
Historical events	data/reference/events.json
Synthetic status	Synthetic dataset

This report is deliberately designed to contain multiple semantic relationships between narrative, tables, charts, dates and events. Future ingestion logic should preserve those relationships rather than flattening the report into arbitrary text chunks.
